

About eSector Solutions Company

Developing and promoting corporate web sites and e-commerce solutions has been the main focus for **eSector solutions** Company since early 2002.

Our people are professionals in:

- Program coding
- Computer design
- Artistry and drawing
- Content writing and editing
- Branding and brand promotions

We are committed to ensuring success and prosperity of your business!

Unlike most of our competitors we do not just develop web sites but help our Clients achieve their online business marketing goals. What makes us different is working on reaching profound awareness of our Client's business needs, close cooperation with the Client's marketing experts as well as meticulous planning of our joint activities to deliver tangible results.

We don't just make web sites - we promote your business.

We understand that you and your business do not need a web site boasting of thousands hit rates. Your business is in need of real Clients, reliable partners and tangible market sector expansion.

Why eSector?

Quality

We guarantee quality control on all stages of development to produce high quality product at the end

Speed

Our continuous focus on internal process efficiency allows us to promise our clients that their online solutions will be delivered on time. We are so confident in our capabilities that we guarantee you timely delivery or you money back!

Customization

Exclusive design, we do not use any templates. The best designers and artists are at your service.

Optimization

Regardless of the project budget all eCommerce solutions we deliver are optimized for all most popular search engines

Usability

We guarantee usability and intuitive user experience for websites we create.

Effective Content

Professional editors closely cooperate with our clients' marketing departments to maximize effectiveness of website content.

Reliable Hosting

Our own dedicated servers in the US guarantee 99.9% uptime

Content Management System (CMS)

WebConstructor 3.8 the best CMS in its class, internally created by our programmers, builds on best functionalities of dozens of other CMS systems

Our Experience

eSector has depth of experience creating and launching:

- B2C and B2B eCommerce portals
- Interfaces for large multi-user enterprise systems (such as CRM, ERP, etc.)

Such experience proves invaluable when designing and developing Back Office systems for online retailers and wholesale distributors.
